

Venkataramanan B

FULLSTACK SOFTWARE DEVELOPER | ZOHO

+91 9865305719 | venkatbala214@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Fullstack Software Developer with 5 years of experience in **Java, React, and SQL**, specializing in building high-performance, user-centric web applications. Currently at **Zoho**, where I recently engineered a **98.8% reduction in page load latency** and a **71% reduction in codebase complexity**. Proven track record of delivering end-to-end features, optimizing CI/CD pipelines to **increase developer velocity by 5x**, and transitioning complex legacy systems into modern JAMstack architectures. Passionate about leveraging **AI-native development tools** like Cursor and GitHub Copilot to accelerate sprint velocity and maintain clean, scalable code.

SKILLS

LANGUAGES: Javascript, Java, Typescript, C/C++, MySql

TECHNOLOGIES: HTML, CSS, Tailwind, Bootstrap, React, NextJs, Redux Toolkit, REST/GraphQL, Jest/React Testing Library, Cypress, Spring Boot, Hibernate ORM

TOOLS: Cursor, Windsurf, Postman, Git, Github/Bitbucket, Mercurial, Jira, Jenkins, Confluence, Agile/Scrum, Chrome Dev Tool, Headless CMS(Storyblok), Linux/Unix, Apache Maven

CONCEPTS: DSA, Design Patterns, CI/CD, Agile/Scrum

EXPERIENCE

ZOHO | Full-Stack Developer | 09/2024 – Present

Project: ATS (Applicant Tracking System) Application — Chennai, India

- **Performance:** Achieved a **98.8% reduction** in page load time (**25s to 300ms**) for data-intensive pages **via pagination**, directly optimizing daily workflows for thousands of users.
- **Architecture:** Streamlined codebase **maintainability by 71%**, refactoring **14 redundant files** into **4 modular components** to reduce technical debt and accelerate debugging.
- **DevOps/Efficiency:** Optimized CI/CD pipelines by unifying branch testing, resulting in a **5x faster** developer feedback loop and an **80% reduction** in resource occupancy.
- **Impact:** Eliminated critical workflow bottlenecks where small processes stalled the development team, enabling a more agile and efficient shipping cadence.

INFOSYS | Senior Systems Engineer | 05/2021-08/2024

Project: B2C eCommerce Retail(Telecommunication) — Mysore, India

- **AI Adoption Leader:** Spearheaded the integration of GitHub Copilot for the engineering team; established best practices for AI-assisted development that accelerated initial feature releases and code quality.

- **Rapid Impact & Recognition:** Earned project-wide recognition within **6 months** for high-velocity contributions to initial product releases and seamless migration from legacy AEM to a JAMstack Micro-Frontend architecture.
- **Architecture & UI:** Designed a config-driven UI system and sophisticated Redux Toolkit data store, optimizing state management for high-traffic landing pages and cart functionality.
- **Technical Leadership:** Mentored a team of two developers and collaborated with architects to deliver unit-tested components via React Testing Library, ensuring **100% feature reliability**.
- **Performance:** Boosted frontend performance via memoized API caching, code splitting, and lazy loading; conducted A/B testing to refine mass user-focused content.
- **Team Culture:** Proactively fostered team cohesion and morale by organizing large-scale team building events and trips, directly improving cross-functional collaboration.

ACHIEVEMENTS

Manager Appreciation | ZOHO – Chennai, India

- Recognized for the early delivery of high-priority features and proactive resolution of security vulnerabilities.
- Commended for improving code safety and overall application reliability within the ATS platform.

Client Recognition Award | INFOSYS – Mysore, India

- Received for the successful end-to-end delivery of a critical project under high-pressure deadlines.
- Commended for technical excellence and reliability in solving complex production-level problems.

EDUCATION

Mepco Schlenk Engineering College | Sivakasi, Tamil Nadu Bachelor of Engineering, Mechanical Engineering | 2020

HOBBIES & INTERESTS

Technical: Competitive Coding and exploring AI-native development tools.

Creative & Wellness: Playing Guitar, Reading, Cycling, Weightlifting, and Dancing.

ADDRESS

Tirunelveli, Tamil Nadu, India — 627109
